

SAILSetc designs

from other builders

introduction

Various designs by SAILSetc have been, or are in production, by other builders. This is a list of known sources. It may not be complete and it is possible some builders have stopped production or have moved from the addresses given. Please advise us where we need to amend the list.

Listing these builders here should not be taken as any recommendation as to the quality of the product.

Different builders will make their boats using different materials and techniques. Even if they are making a boat that SAILSetc is producing they will have their own unique way of completing the boat. Each will have their own strengths. Potential customers of these builders should check the specifications of the boat, plans, building instructions etc before ordering any products to ensure they will be happy with the end result.

plans & instructions

All SAILSetc hull mouldings and kits are accompanied by adequate plans and/or instructions.

Please be aware that if you purchase from the builders listed here you should expect to obtain building instructions and plans **from them** and not from SAILSetc. You may find the quality of such material provided varies. If you find you do not receive adequate information from the builder please report back to the him.

Please bear in mind that if we provide such material instead of the original builder we will wish to make a charge.

royalties

The builders will all be aware that they shall pay a royalty on each hull moulded to the designer. You will not be expected to pay any royalty element to SAILSetc directly but part of the price you pay for the hull will cover the royalty due from the primary manufacturer.
