

*plan update – May 20<sup>th</sup> 2011*

## *International Ten Rater – GRAFFITO*

The copying process has introduced distortion to the size and/or proportion of the sections and building shadows on some plans.

Check this by measuring the grid. It should be 20 mm x 20 mm. If it is not correctly 20 x 20 you may find the boat does not float at the designed waterline.

Action

Compensate for the error

Either

by photocopying on a machine that allows you to re-scale the horizontal and vertical dimensions independently

Or

by contacting the SAILSetc office so we can post you a printed correction or send a DXF or IGES file of the sections.
